Breaking New Ground: *Building Resilience Today for Improved Global Food Systems Tomorrow*

<p>In the GYI this year, we've talked a lot about how soil quality is the key to completely feeding a healthy world. From your experience in different fields, how do you think youth can play into this?</p>	<p>Mira Gowda</p>	<p>I think that young people can play a role in soil health by researching and improving agricultural production and manufacturing, to reduce some of the emissions that are decreasing the health of soil., Isabella Scramoncin</p> <p>I think our role in soil quality is to pressure the industry to apply existing techniques as soon as possible in order to start tackling this issue immediately, I would also agree in the fact that it is up to us to further develop and better existing techniques and technology to better soil quality, Genis Pou</p> <p>In view of type, organic carbon and analysis of other elements yield targeting approach can be followed ., Kiran Kokate</p>
<p>Not sure this is anyone's problem here: I posted the Food Systems Hero link on my Facebook page. The link goes live but no image is associated with it. Just a black box.</p>	<p>Charles Isenhardt</p>	<p>Hello Charles, try posting the photo independently!, Amy Bettle</p>
